Notes and features

- The BKT EM 933 Super is a tyre for excavators in use for excavation or loading work.
- Its special sidewall with protruding rib allows close contact between the tyres during twin use and prevents stones from penetrating.
- An intermediate rubber ring between the two tyres is therefore no longer necessary.
- The special tread pattern provides excellent traction even in the most difficult conditions.
- The tyre also guarantees very good ride comfort and improved self-cleaning properties.
