Brand	Michelin
Tread pattern	TrailXBib

Notes and features

- The Michelin TrailXBib is a VF radial tyre for towed vehicles such as agricultural trailers, manure spreaders and slurry tanks.
- Thanks to the VF technology, high loading capacities at low inflation pressure and thus low soil compaction are possible.
- The tread pattern with notched lugs and a circumferential bar in the tread centre provides even wear and great rolling characteristics during road transport.
- The special tread pattern design with curved lugs and flexible lug blocks guarantees good self-cleaning where mud in particular is ejected effectively.
