Notes and features

- The Alliance Agro Forestry 333 is a newly-developed 85 series steel belted forestry tyre for tractors used in forestry.
- The tyre is characterised by good grip, high traction, low slip and low fuel consumption.
- Due to its extra-large contact area, large tread depth and cut- and puncture-resistant rubber compound, the tyre is very sturdy and durable.
- The solid bead core and reinforced sidewalls with a high ply turn-up in the bead area ensure excellent stability and puncture protection.
- The lugs are 25% higher than on standard R-1 tyres and provide high traction even on wet soil.
