Notes and features

- The Alliance 365 as a VF tyre is a modern agricultural tyre for powerful tractors up to 250 hp.
- The VF technology (Very High Flexion) enables up to 40% higher loading capacity at the same inflation pressure and speed.
- Due to the large contact area and low inflation pressure, the soil is optimally protected.
- The shape and arrangement of lugs allow optimum traction power distribution.
- Thanks to the NRO technology (Narrow Rim Option), the tyre can also be mounted on a narrower rim than e.g. IF and VF tyres of the same size in other versions or from other suppliers.
- As the tyre is approved for speeds up to 65 km/h, it is also suitable for road transport.
