Brand	BKT	
Tread pattern	Agrimax V-Flecto	

Notes and features

- The BKT Agrimax V-Flecto is a VF tyre of the new generation.
- Compared with a standard tyre, the tyre achieves 40% more load capacity at the same inflation pressure or the same load capacity with 40% less inflation pressure.
- In contrast to most VF tyres, the tyre can be mounted on a standard rim (NRO=Narrow Rim Option).
- Its 10 % larger contact area compared with a standard tyre enables outstanding traction while significantly reducing soil compaction.
- The specially shaped bead (Bead Protection System) closes extremely airtight and keeps the inflation pressure constant in all conditions.
- During road journeys, the particular lug angles ensure reduced vibrations and noise levels.
- There is no need to adjust the inflation pressure for optimum performance both in the field and on the road
- The extremely strong polyester casing provides a 10 % longer service life in comparison with a standard tyre, even in difficult conditions.
